Program

37th STAR Conference

Wednesday July 6 – Friday July 8, 2016

Faculty of Humanities and Social Sciences
University of Zagreb

Under the auspices of the Mayor of Zagreb Mr. Milan Bandić
Dear friends and colleagues,

Welcome to the 37th STAR conference in Zagreb, Croatia!

The annual Stress and Anxiety Research Society (STAR) conferences provide a unique opportunity to share, learn and discuss recent theoretical and applied developments in the fields of stress, anxiety and coping. In this setting, STAR has been exceedingly active in providing an opportunity to disseminate research and clinical findings in an international forum.

The theme of the 2016 conference is Stress and Anxiety in a Changing Society. In Croatia and the wider Balkan region, the last 25 years have been characterized by a period of high turbulence. We have experienced massive changes to our social systems and national borders, which culminated in war and a subsequent economic crisis that continues to this day. In addition, this region has been faced with the changes experienced by today’s societies worldwide, such as those related to globalization, new technologies and new norms regarding respect for individual diversity and human rights. While these challenges offer a wealth of new opportunities, they also act as potential sources of stress and anxiety. At the conference, we hope to encourage discussion and reflection on the interesting changes faced by all of us, no matter where we find ourselves in the world. During paper and poster sessions, keynote lectures, workshops and various social events, you will have an opportunity to share ideas, gain new knowledge, establish social contacts and derive inspiration.
We are very pleased to announce that participants at the 37th STAR conference will have an opportunity to listen to invited lectures from top experts in the field of stress and anxiety. We are also very proud that participants at the conference represent 33 countries from around the world, whose work you will be able to hear within 12 symposia, 120 oral presentations and 61 poster presentations. This year's STAR Conference also offers participants chances for additional training during 7 different workshops.

The 37th STAR conference is hosted by the Department of Psychology in the Faculty of Humanities and Social Sciences at the University of Zagreb, which is also acting as the official conference venue. The Department of Psychology at the University of Zagreb is the leading centre for psychology studies in Croatia with a strong academic tradition spanning over 80 years. The University of Zagreb (est. 1669) is the oldest university in South-Eastern Europe. With its comprehensive programs and over 50,000 full-time undergraduate and postgraduate students, the University is the most highly recognized teaching institution in Croatia. The Faculty of Humanities and Social Sciences is the leading humanities and social sciences faculty in Croatia, with high results achieved in both teaching and research.

We hope that the 2016 STAR conference will be a stimulating and inspirational experience in academic, professional and social spheres. In addition to a rich scientific program, we invite you to participate in the informal social activities that we have prepared, where we hope that further exchange of ideas and cooperation among all participants – scientists, researchers, practitioners and students – will be encouraged.

It is our great pleasure to warmly welcome you to the 37th International STAR Conference. We invite you to enjoy the rich and intensive academic program, experience the welcoming atmosphere of the University of Zagreb and explore the pleasures of the city of Zagreb.

Nataša Jokić-Begić
Dear colleagues,

I am delighted to welcome you to the 37th Annual Conference of STAR: The Stress and Anxiety Research Society.

STAR is a truly global research society with a strong focus on the concepts of stress, anxiety, and coping. We have a mission to promote the study of these concepts, in order to progress both our understanding and our development of applied practice. As a multidisciplinary community, STAR provides a unique platform for behavioural, social and health scientists from right across the world.

As well as a strong emphasis on applied and experimental research in stress and anxiety psychology, STAR conferences also focus on social, political, and policy-related aspects of these subjects.

Our conference has travelled the world for nearly four decades, and we are pleased to now visit the beautiful city of Zagreb. The themes of the conference related to a wide range of conceptual and applied topics of both perennial and contemporary significance.

The schedule for STAR 2016 incorporates a vibrant sequence of keynote addresses from leading figures in stress and anxiety research, as well as paper sessions, workshops, exhibitions, and social activities.

The conference team has prepared an outstanding programme, and STAR 2016 is set to be a truly excellent occasion. It is our pleasure to be in Croatia, to grow, to explore, and to learn.

Dobrodošli!

Best wishes,

Brian Hughes
INTRODUCING ORGANIZERS

Stress and Anxiety Research Society

The Stress and Anxiety Research Society (STAR) is a multidisciplinary, international organization of researchers who share an interest in problems of stress, coping, and anxiety. Its members, from more than 35 countries, meet annually to exchange research findings and clinical applications on a wide range of stress and anxiety related phenomena. STAR conferences provide a unique opportunity to learn, not just about stress and anxiety, but also how psychology is studied and practiced throughout the world. STAR has been exceedingly active in providing an opportunity to share research and clinical findings in an international forum.

Faculty of Humanities and Social Sciences, University of Zagreb

The University of Zagreb is the oldest university in Croatia and among the oldest universities in South-Eastern Europe. The Faculty of Humanities and Social Sciences is the largest Faculty at the University and offers more than 100 study programs. From 2005/2006, the Faculty has offered new programs in accordance with the Bologna process (42 BA and 33 MA programs). At the Faculty of Humanities and Social Sciences, students are provided with opportunities to explore various fields in the humanities, such as history, archaeology, philosophy, ethnology, anthropology, art history, languages, literature and linguistics, and the social
sciences, such as psychology, sociology, information sciences and pedagogy. The Faculty of Humanities and Social Sciences is committed to assuring excellence and expanding the boundaries of knowledge and insight through teaching and research carried out within a wide range of scholarly fields.

Center for Clinical Psychology, Zagreb

The Center for Clinical Psychology is an organization engaged in the monitoring, promotion and research of mental health and providing psychological counseling and treatment. The Center for Clinical Psychology promotes a cognitive behavioral approach in the treatment of psychological difficulties and disorders.
INTRODUCING ZAGREB

Zagreb is the capital city of the Republic of Croatia. As the largest city in Croatia with a wealth of cultural, gastronomic and touristic experiences on offer, it represents both a modern and traditional middle European metropolis. Since the first historical records of what was then known as Kaptol in 1094 and the declaration of Gradec as a free royal city in 1242, Zagreb has been and remains an important transportation hub for this part of Europe. The rich and interesting history of this city is marked by historical battles, a devastating earthquake, technological progress and the growth of the city over the banks of the river Sava. As we know it today, Zagreb is a bustling city filled with museums, theatres, cultural sites, sculptures and more.

One of the interesting things to see and experience in the very centre of Zagreb is the funicular. After 1-min climbing, you will have a spectacular view from the old part of the town (Gornji grad).

If you enjoy walking and socializing in the outdoors, you might be interested in visiting Nature Park Medvednica, which can be reached in only 20 minutes by car from the city centre. It offers opportunities for active or passive relaxation – you can walk through untouched nature and taste different traditional food dishes in one of the mountain lodges or you can relax at some of the wellness centres. If you stay at the top of Medvednica mountain until sunset, you will have an opportunity to see the most beautiful night view of Zagreb.

For more ideas, please check http://www.infozagreb.hr/
CONFERENCE INFORMATION

Organising Committee

Scientific Committee

Conference Venue

All conference sessions will take place at the Faculty of Humanities and Social Sciences, which is located in the wider city centre of Zagreb (address: Ivana Lučića 3, 10000 Zagreb, Croatia).

Walking from the central city square (Ban Jelačić Square) to the conference venue will take you 20 to 25 minutes. From Ban Jelačić Square you can also reach the Faculty by tram line number 13 travelling in the direction Savišće. On this tram, you must exit at tram station Sveučilišna aleja on Avenija Vukovar street. Walking south from the tram station for approximately 6 minutes, you will see the Faculty building on the left side, behind a large parking site. From the central train station (Glavni kolodvor), the easiest way to reach the Faculty is by foot. This walk will take approximately 15 minutes. You can also get a taxi (call 1414, 1717, 1212) or Uber, or even rent a bike.

GPS coordinates: N 45° 47.827'; E 015° 58.359'

The faculty is designed to guarantee easy access for persons with disabilities. Smoking within and in front of the conference building (as in all public buildings) is strictly forbidden by law.
Registration/Information Desk

The registration/information desk can be found in the lobby on the ground floor. You can easily find it if you turn right when you enter the building. There are also many (voluntary) staff members available to assist you with any queries and questions you may have. We shall do our utmost to help with any problems that may arise. You will be able to recognize the volunteer STAR staff by their yellow coloured T-shirts. You can reach us at +385 98 901 85 19.
Conference Rooms (see the map)

Plenary Sessions: Hall D7 (ground floor)

Sessions and Workshops: Halls D1, D2, D3, D5, A203 (2nd floor), and Conference and Computer Room in the Library (1st and 2nd floor)

Poster Sessions: Library entrance hall (ground floor)

Presentation Guidelines

Keynote lecture – 60 min

Oral presentation – 15 min

The official language of the Conference is English.

A media projector with a PC will be provided in each conference room. So that all materials can be uploaded before each session begins, we kindly ask presenters to provide their presentations in electronic format to the person in charge in the session lecture hall 15 minutes prior to the start of their session. It is advisable for presentation to be reachable in different ways (e.g. from memory stick, via e-mail, via drop box etc.)

The Poster Sessions take place in the Library entrance hall (ground floor). Posters should be set up in the morning (before the morning sessions) and must be displayed until the end of the evening sessions. At your designated poster location (poster’s number in the programme will be written on the poster panel), you will find all materials needed to set up the poster. Our volunteers will also be glad to help you with this.

Presenters are expected to be present beside their poster and available for discussion during the morning coffee break.

In the program the presenters are indicated by italic font.

Internet Connection

During the conference, it will be possible to access free wi-fi at the Faculty. The network name is ff-local. Participants will get the password during registration and it will be posted in every conference room.

The eduroam roaming access service is also available at the Faculty.

Emergency Numbers

In case of fire, accidents, etc., you can contact the general emergency number 112. Simply state the nature of the problem and police / fire brigade / ambulance will be dispatched.

In case you need medical attention, please contact the registration/information desk on the ground floor. They will contact a doctor or make other arrangements to suit your needs. The telephone number of the registration/information desk is +385 98 901 85 19.

Opening Ceremony

The opening ceremony will be held at 12:30 on Wednesday, July 6th, 2016 in Lecture Hall D7 at the Faculty of Humanities and Social Sciences.

Welcome Reception

The welcome reception will be held at The Dverce Palace (Katarina Square 6 in the Upper Town, Gornji grad) on Wednesday, July 6th, 2016 from 20:00.

The Dverce Palace (former Buratti Palace) is a property of the City of Zagreb used for representative events organized by the Mayor and City Council. The building rests on the city walls and gained its current appearance in the 19th century following a reconstruction carried out by the architect Kuno Waidmann. The last private owner of the palace, contessa Klotilda Buratti, gave it to the city of Zagreb and, since that time, it has been used for numerous gala banquets. To get to the palace, it is best to go on foot. It is a 30 minute walk from the Faculty, in the city centre.

Dress Code: Casual

Conference Dinner

The conference dinner will be held on Thursday, July 7th, 2016 at 20:00 in the restaurant Lobby, Ivana Lučića 2a. It is located just 3 minutes walk from the conference venue. You can easily find it if you exit the Faculty building and turn right down the street. On the opposite side of the street you will see a modern business complex with Lobby restaurant located in the front.

Coffee Breaks

Coffee and snacks will be offered in front of the lecture halls (D1 to D3) and in the Library entrance hall during program breaks.

Lunches

Conference lunches will be held in the 1st floor lobby of the Faculty, from 13.00-14.00 on Thursday, July 7th and on Friday, July 8th. Please be sure to bring your lunch vouchers in order to gain access.

37th STAR ethno antistress zone

During the conference, we invite you to relax in the ethno antistress zone provided in the Faculty Lobby.

Our ethno antistress zone, jointly conceptualized by psychologists and ethnologists, is a space for relaxation and contemplation in a surrounding of traditional Croatian arts and crafts. In the antistress zone, you will discover and even participate in the unique artistic activities such as making your own lace, colouring STAR(wo)man or making a personalized brooch. You will also have an opportunity to sample a “magic” nectar prepared from an ancient recipe. Throughout the conference, we are also honoured to be able to exhibit the ‘Shelter for Feeling’ by multimedia artist Akiko Sato, on the 1st floor of the Faculty, room A-122. We hope you will find time in the antistress zone to be a unique, multi-sensory experience.

The Ethno antistress zone has been realized as a joint enterprise between the Department of Psychology and Department of Ethnology at the Faculty of Humanities and Social Sciences, along with the Ethnographical Museum in Zagreb, the “Klobook” Society in Čakovec and the “Lace Makers Association Danica Brössler” in Lepoglava (more details on page 48).

MORE DETAILS ABOUT 37TH STAR ETHNO ANTISTRESS ZONE

Akiko Sato: "Shelter for the feeling“ / Lace Tent Project, 2007-2008,
in collaboration with 10 lacemakers  from "Lace Makers Association Danica Brösller"
Space installation 140 x 280 cm

Akiko Sato was born in Mie Japan, spent part of her childhood in Philippines. She
attended Kuwasawa Design School in Tokyo, Japan, where she studied interior ar-
chitecture. She moved to Seattle, USA, where she holds BFA from Cornish College
of the Arts. Akiko Sato is a multi media artist, currently lives in Croatia. Her works
stem from collaborative theater work, to installation, performance, and community
involving art work.

"I moved to Croatia in the year 2003. A major difference from the last time I moved
was that, this time, I was a mother. I was breast-feeding my daughter and with the
help of jet lag, I was often left in the silence in the midst of darkness. Beyond the
window there was something unknown and strange, a new world I did not know well. As I was lying in bed, my eye followed the movements of the wind captured in the shadow of lace. A soft pattern was moving along the floor and the window pane. Punto in Aria stitches in the air, as some call lace. I was in a dream, I was embraced by the beautiful shadow of lace.

Each culture is like the current of a stream, with a group of people who share time together. I felt like a ball of sponge just thrown into a different current, floating on the surface of the water. I had to start collecting new knowledge. Just like the sponge when it gets heavy with water and sinks, I too had to sink into the stream to become a part of it, and to feel much more comfortable. The mother-in-law, whom I had never met, gazes very kindly at me, smiling in the photograph. If she was alive, she would probably have gladly helped me by giving me various advices. Thinking about it, I remember how my father-in-law gave me a bag full of lace saying: ‘Would you be interested in taking this, I don't need it since there is no woman in the house.’ It was my first contact with lace in Croatia. Stains on the lace appeared to me like a door to a time-machine, sweeping me into the real life of when this lace had been used. Smells of good soup from the kitchen, how to wash white linen, a lullaby that everybody knows, the magic words that turn every child’s worries into a smile. I took the pieces of lace into my hand, one by one, unfolding with them all the household tips, elements of home, things that my daughter deserves to have.

I use the tent metaphorically in my work, as a basic unit of home, a portable home, which one can fold and take away to the next destination. The process of the Lace Tent Project was a quenching experience, as it progressed, the earliest perception of the lace tent I had envisaged was slowly replaced with what grew to be a solid reality reinforced by many people's efforts, ideas and help.

The tent was formed with infinite stories of the rural life of Lepoglava women, poem of obsessive quest for beauty in the microscopic world of lace."
KLOBOOK is a therapeutic group for individuals being treated for cancer at the psychiatric hospital Čakovec. This program, led by psychologist Andreja Bogdan and psychiatrist Živko Mišević, aims to provide psychological support to oncology patients. It also includes an occupational therapy-led program in which participants make decorative crafts, pictures, greeting cards and jewelry using various techniques and materials. The creativity and enthusiasm of this group of 20 individuals helped inspire and create STAR(wo)man brooch. Each brooch has been individually crafted with great joy and care and, as such, we believe it will contribute to a unique and unforgettable experience for participants at the 37th STAR Conference in Zagreb.

Lepoglava Lace, The Lepoglava Lace Cooperative

Lepoglava is a town in the northwestern part of Croatia, well-known for its rich natural and cultural heritage, especially its old tradition of lace making and international lace festivals that have been held there since 1997. The skill of making Lepoglava lace, along with those from the islands of Pag and Hvar, was inscribed in the UNESCO List of Intangible Cultural Heritage in 2009. Bobbin lace based
on Danica Brössler’s designs is still made in Lepoglava and it carries the name of “Lepoglava lace”.

The Lepoglava Lace Cooperative participated at the exhibitions held at the Museum of Lace in Volgoda (Russia) and in the Chinese cities of Shanghai, Shenzhen and Guangzho. Since 2013, the association has been making jewelry with Lepoglava lace (necklaces, bracelets, earrings and brooches). The jewelry has been successfully presented as a diplomatic gift at the national level, and their new owners are the Swedish queen, Japanese princess and the Dutch queen.

Snježana Varović found her inspiration in the beauty of Lepoglava lace, its motifs and “bobbin lace” technique. Flower lace petals, made by metalized thread, are complemented by glass beads, various stones or Swarovski crystals, and are shaped into necklaces or chain threads.

Every single piece of jewelry, necklace, chain, earring, or a bracelet, is a new and unique creation made for a specific occasion, dress or a person. She says: “I love creating pieces for a person I know, because the final creation has a part of their personality embedded in it.”
The 37th STAR Conference would not have been possible without the financial and material support of our sponsors and donors, to whom we would like to express our deepest gratitude.

The conference was supported financially and through the provision of goods and services:

Angelini Pharma Österreich
